

Adding PDF Files and Running Metadata Editor

1. **Prepare Your PDFs:**
 - Place PDFs with correct metadata in “Original” folder.
 - Place PDFs needing metadata update in “Edited” folder, matching filenames with “Original”.
2. **Adding PDFs:**
 - Copy or move PDFs to respective folders as per their metadata status.
3. **Running Metadata Editor:**
 - Locate and double-click `Metadata Editor.exe`.
 - Application will process files automatically, displaying progress messages.
4. **Completion:**
 - After processing, view total files processed.
 - Press any key to close the application.

Following these steps, you can quickly add PDFs to folders and run `Metadata Editor.exe` to update their metadata.
